

## ASBESTOS RE-OCCUPANCY CERTIFICATION

After the completion of this renovation project, the local building official cannot allow re-occupancy until this certification form is completed and returned.

I hereby certify that the response actions have been completed and final clearances have been measured. The final clearance levels of the abatement area were .01 (or fewer) fibers per cubic centimeter if determined by Phase Contrast Microscopy analysis (PCM) or 70 (or fewer) structures per square centimeter if determined by Transmission Microscopy analysis (TEM).
